Uvod

Opis funkcionalnosti sajta i teme koju treba da zadovolji :

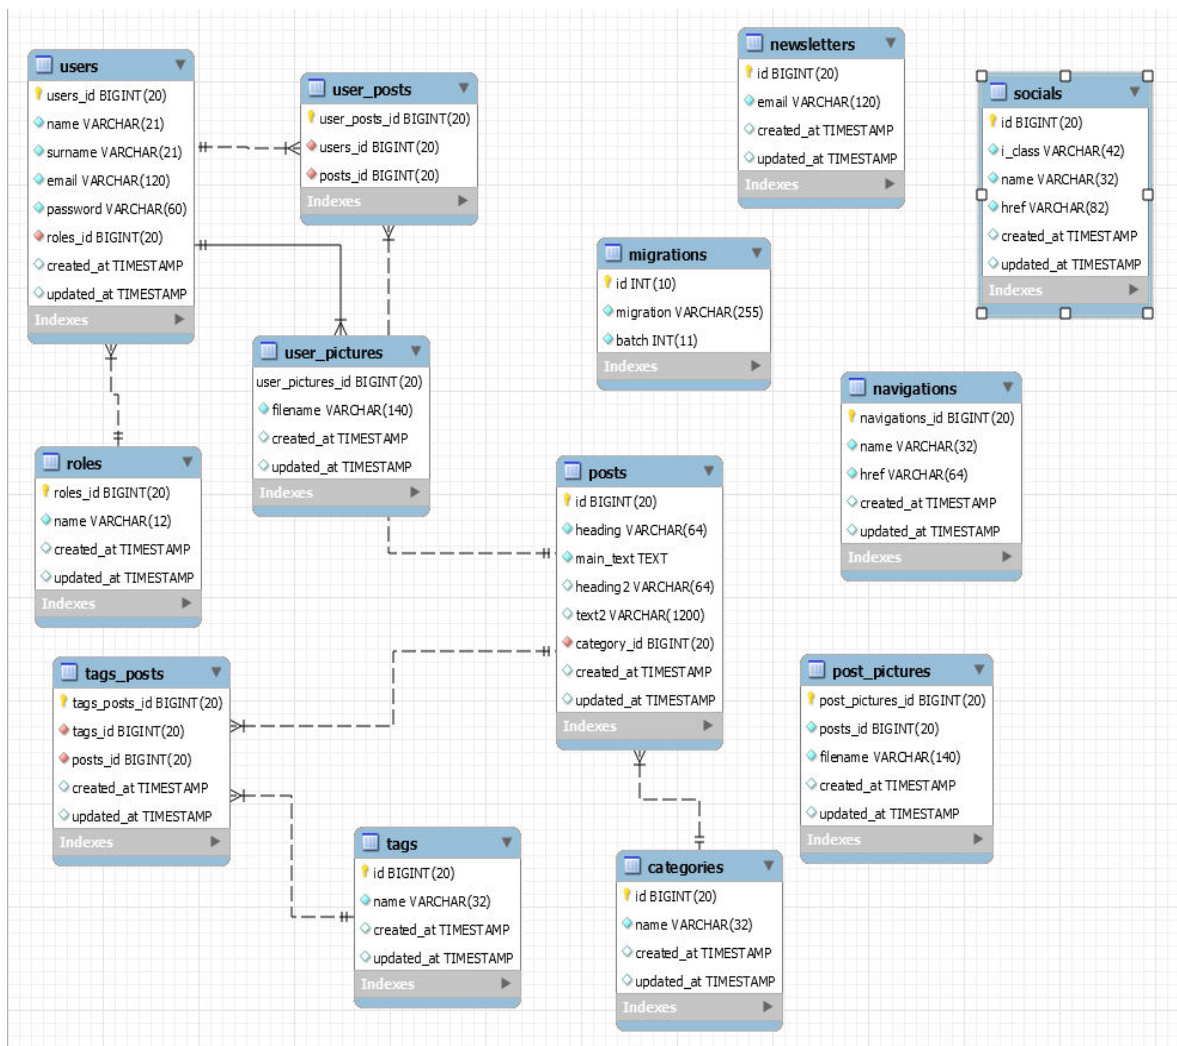

- Sam koncept web sajta bazira se na online blogu, čija je svrha da korisnicima prikaže najbolje članke vezane za vođenje biznisa. Samim tim na sajtu se mogu pronaći mnogi članci vezani za Menadžment, Biznis Leading, Investiranje, IT i drugo. Registrovanje naloga otvara nove mogućnosti korisnicima, kao što su na primer komentarisanje članaka, slanje poruke administratoru, promena profilne slike. Ukoliko korisnik ima ulogu admina, otvara mu se pristup strani /admin na kojoj ima mogućnost da upravlja dinamičkim sadržajem sajta, a pored toga i uvid o tome koje su aktivnosti korisnika bile zastupljene.
- **Bitno:** Baza je projektovana tako da postoji veći broj funkcionalnosti na sajtu, međutim, kasno sam počeo profesore sa izradom...

Organizacija sajta

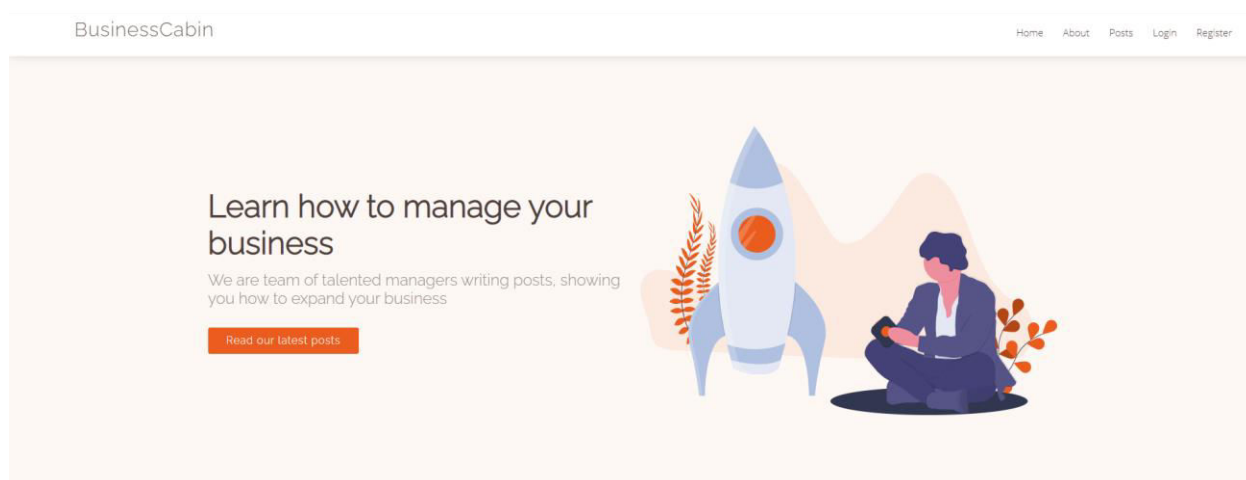

- Websajt je napravljen tako da se može pristupiti svim stranicama sajta koje su navedene u navigaciji (Navigacija je fiksni deo, pa stoga). Bitno je napomenuti da se modalima za logovanje i registraciju ne može pristupiti ukoliko je sesija aktivna, a pritom ukoliko nije, korisnik ne može da pristupi linkovima za slanje poruke, odjavljivanje i promenu profilne slike (*meni se dinamički menja*). Admin panelu se može pristupiti samo putem url adrese **/admin** i to samo onim korisnicima koji su ulogovani sa ulogom admin!

Organizacija baze podataka

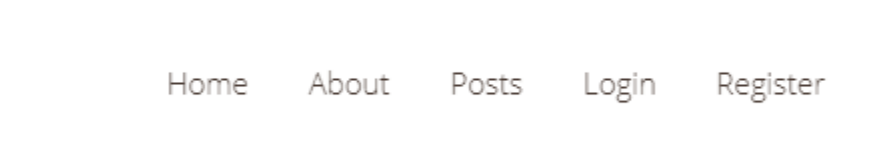

- Baza podataka je projektovana tako da postoji veći broj mogućnosti kao što sam napomenuo, jednostvano sam kasno počeo sa izradom, te nisam imao vremena. Bitno napomenuti da su tabele kreirane putem Migracija, i velika većina njih popunjena Seeder-ima.

Opis funkcionalnosti

Glavna stranica websajta, na kojoj se nalaze opšte informacije o delatnosti kompanije *BussinessCabin*. Na vrhu strane nalazi se dinamički meni čiji se sadržaj menja u odnosu na to da li je korisnik ulogovan ili ne.

Sadržaj menija ukoliko sesija nije aktivna.

Sadržaj menija, ukoliko je sesija i aktivna i korisnik ulogovan.

Klikom na navigacioni link **Login** otvara se modal koji ispisuje formu za logovanje korisnika. Forma je validirana i na Front-u i na Back-u. Ukoliko uneseni kredencijali zadovoljavaju normu, sesija biva aktivirana i korisnik obavešten o uspešnosti logovanja.

Kao i u prethodnom primeru, samo što ovaj put posmatramo funkcionalnost registracije. Ukoliko korisnik uspešno zadovolji normu unosa i pritisne dugme register, on biva upisan u bazu i samim tim dobija obaveštenje o uspešnosti registracije. Svi novi korisnici bivaju upisani u bazu sa ulogom **Korisnika**, i samo admin može promeniti njihovu ulogu na sajtu!

Ukoliko se korisnik uspešno ulogovao , promenjeni navigacioni meni sadrži novi link sa imenom korisnika, ukoliko korisnik klikne taj link, iskače mu dropDown lista sa ponuđenim opcijama, gde je jedna od njih **Logout**, koja briše celokupnu sesiju te samim tim korisnik više nije ulogovan. Klikom na drugi link, korisniku se otvara mogućnost da promeni svoju default-nu sliku.

Kada korisnik izabere datoteku i prosledi je dugmetom update, ona automatski biva resize-ovana na veličinu od 300x300px. Korisnik biva obavešten o uspešnosti promene.

Klikom na dugme **Message** u navigacionom meniju, otvara se modal sa formom “*Message*”. Ukoliko korisnik ispuni norme za slanje poruke, u vidu provere teksta. Poruka biva prosleđena na mail administratora websajta, I korisnik biva obavešten o tome.

BITNO: Profesore, kod za slanje mejla je celokupno ispisan, od Mailable klase do Kontrolera, medjutim kada želim da se taj mejl pošalje, server me odbija, nakon nekog istraživanja video sam da je to zato što postoji zaštita pristupa na mail adresi koja je upisana u .env fajl, te je ona ta koja blokira slanje poruke. Kod je u potpunosti ispisan, ali zakomentaran. Budite milostivi

Posts strana je ona strana koja sadrži sve postove koji se nalaze u bazi podataka. Postovi su dinamički ispisani iz baze podataka I poredjani su po datumu kreiranja. Postovi su prikazani u vidu divova koji sadrže sliku posta, njegov naslov, I deo teksta, kao i dugme **Read More** koje preusmerava korisnika na stranicu koja sadrži detaljniji opis tog posta.

Ispod svih postova zastupljena je paginacija, u ovom slučaju ispisana u Back-u.

BITNO: Primetićete da određeni postovi imaju zastarele datume, to je zato što su postovi bili upisani Fejkerom, te sam ih ja samo update-ovao kroz admin panel. Svi novo dodati postovi imaju dobar datum.

Sa desne strane, pored postova, nalazi se sekcija u kojoj su poredjane sve kategorije, tagovi, search bar, kao i zadnje izbačeni postovi.

Unosenjem vrednosti u search bar I klikom na lupu pored inputa, bivaju izbačeni svi postovi koji u svom naslovu ili teksta imaju tu vrednost. Funkcionalnost odradjena **AJAX-om**. Nakon filtera, ispod postova se pojavljuje nova paginacija u odnosu na broj rezultata, paginacija je takodje ispisana **AJAX-om**, I klikom na neki link nove paginacije, naknadno se šalju novi **AJAX** zahtevi koji uzimaju podatke iz baze.

Pored toga desna sekcija sadrži i izlistane tagove i kategorije, pored naziva kategorija, stoji broj postova sa tom kategorijom. Klikom na neki od linkova kategorije i tagova. Postovi koji sadrže te tagove, ili su te kategorije bivaju izlistani u sekciji levo. Solve a burning problem

Sasa Pajovic Jul 06 1971 1 Comments

An important business tip for new entrepreneurs is to create a business that solves a problem. If you asked most failed business owners what problem they solved, they either can't answer or the problem they solved wasn't urgent enough. The problem you solve doesn't need to be complicated like curing a disease. It can be simple, such as we help people overcome boredom by providing an entertaining experience. But ultimately, you need to know what you're trying to accomplish with your business. By knowing what burning problem you're solving, you can use that in your marketing to help people understand how you can help them best. For example, if you sell anti-snoring products, you'll want your ad to show the frustration a snorer can have on a person's sleep. And then showcase your product as the handy solution that'll allow them to sleep through the night again.

Management Tips, Office, Smart

An amazing thing happens when you get honest with yourself and start doing what you love, what makes you happy. Your life literally slows down. You stop wishing for the weekend. You stop merely looking forward to special events.

Klikom na dugme **ReadMore** ili na naslov post-a, korisnik biva redirektovan na stranicu koja bliže opisuje zadati post. Na toj strani je takođe izlistan autor posta, broj komentara, datum objave, kategorija kojoj post pripada, kao i njegovi tagovi. Ukoliko je korisnik ulogovan i klikne na dugme *Leave a Comment* pojavljuje se modal koji u sebi sadrži formu koja prima text komentara. Ukoliko uneti tekst zadovolja normu, korisnik biva obavešten o uspešnosti komentarisanja, i komentar se pojavljuje ispod posta.

Fiksni deo svake stranice jeste i futer, koji u sebi sadrži formu za ***Subscribe***. Korisnik ne mora biti ulogovan da bi prosledio svoj mail. Pored toga u footer-u su ispisani dinamički linkovi za društvene mreže kao i link ka portfoliju autora.

Admin Panel

Ukoliko je ulogovani korisnik ***admin***, otvara mu se mogućnost pristupa admin panelu, koji sadrži informacije o dinamičkom sadržaju website-a, kao i mogućnost promene tog sadržaja.

Sve mogućnosti admin panela izlistane su u meni sa leve strane.

How millennials can contribute to their financial futures?

Post Content

Millennials have made headlines for everything from their tendency to job-hop to their fondness for avocados. There's a reason the media has a laser-focus on millennial habits: In the not-too-distant future, the spending power of this avocado-loving generation has significant implications for governments, NGOs, and businesses the world over. Financial experts are keeping a close watch on millennial investment data to gain insight into what this generation cares about and how it affects their long-term choices. According to a UBS Investor Watch report, millennials are optimistic about achieving their financial goals — even though they tend to invest conservatively. They also

Sekcija sa kategorijama i tagovima, izlistava sve kategorije ili tagove, i daje mogućnost korisniku da izbriše bilo koju kategoriju ili tag, update-uje je ili pak kreira novu.

BITNO: Profesore nemojte brisati one kategorije ili tagove koje niste dodali, jer je u bazi kaskadno brisanje, pa će se obrisati i postovi.
